YUGOSLAV TEXTILE INDUSTRY EXPANDS;
CONSTRUCTION OF BULGARIAN BOILER PLANT DELAYED

MORE TEXTILE FACTORIES PLANNED -- Borba, No 162, 9 Jul 50

In addition to the textile factories in Tetovo, Titov Veles, and Ajdovscina, which were built in 1949, the construction of six more textile factories is contemplated this year. The projected factories include a cotton spinning mill for combed yarn in Capljina and cotton spinning mills in Stip, Pristina, and Sinj, all of which will also produce cotton thread. A large wool factory will be built in Samnica, while a cotton lint factory will be built in Zadar.

According to the plan, these factories are to begin production by the end of 1951. With the construction of these factories, the production plan of the Yugoslav textile industry will call for one third more than the present production.

TO PRODUCE WASHING MACHINES -- Slovenski Porocevalec, No 158, 5 Jul 50

The "David Pajic" Metal Factory in Belgrade has been producing freight and passenger elevators for several years.

Soon the factory will begin the serial production of centrifugal washing machines and electric laundry dryers.

The factory recently increased its production of passenger elevators and is now producing 12 elevators per month. The factory also repairs old elevators.

CRITICIZE DRAFTING OF PLANS -- Izgrev, No 1772, 28 Jun 50

Construction of the new "Georgi Kirkov" Boiler Plant has been considerable delayed by tardy and inadequate drafting of the plans and estimates. Excavation work for the housing settlement, the machine shop and assembling department, the forge department, and the raw material warehouse started in May. However, the work is not progressing, as the final plans for other essential and auxiliary installations are either not yet established or not approved; some plans are being received after a delay of 2 months. Surveying has been so inaccurate that the construction of some projects has had to be suspended. No interior plans have yet been submitted.
